Performance in the perfect package

Sime's compact wall hung gas boiler for both hydronic heating & domestic hot water applications. This combo unit offers instantaneous performance, is aesthetically pleasing and comes in a compact package with minimum maintenance required.

PLANET DEWY 60 BFR

Wall hung premixed condensing boiler for heating applications

Designed for central heating only this unit was developed specifically to meet the needs of large residential to small commercial loads; but can be coupled together in a modular package for large commercial installations.

RMG Mk.II - RS Mk.II

Your solution for modular combinations

Sime floor standing boilers are made with cast-iron heat-exchangers and are offered in order to meet your needs for small commercial to large commercial installations. These units can be fuelled with natural gas or liquid propane gas.

Sime, available world wide in over 60 countries, is now offered in North America for the first time, distributed exclusively by Thermal Hydronic Supply.
