

## A new face in heating technology

### A name you might recognize

What you might not know is that Sime is one of the top 10 Boiler manufacturers in Europe, and a global leader in wall hung technology. Sime produces a comprehensive range of wall hung and floor standing boilers, combo units and open-vent boilers. With modulating outputs ranging from 40,000 to 1,200,000 Btu/h, modular and cascade systems, there is a Sime Product for almost every domestic and commercial application.

The product range also includes high efficiency boilers with up to 97% efficiency, low NOx emissions, and optional weather compensation control to minimize energy use and reduce the impact on the environment.

Quality and performance come standard with any product bearing the Sime brand. We have invested heavily in our infrastructure and "after sales service", giving you the technical back up and peace of mind you deserve.

Sime... comfort in efficiency.

*If you interested in becoming a Distributor of the SIME product line, please contact [info@thermalhydronics.com](mailto:info@thermalhydronics.com)*

### Performance in the perfect package

Sime's compact wall hung gas boiler for both hydronic heating & domestic hot water applications. This combo unit offers instantaneous performance, is aesthetically pleasing and comes in a compact package with minimum maintenance required.
